

CARDIO

Adaptive Motion Trainer®

AMT® 885

Product Highlights

The AMT 885 combines essential reliability and ease of use with smooth, flowing and precise motion to add value to your facility. The AMT with Open Stride™ is the only variable stride cardio equipment with adjustable step height, allowing exercisers to train in a variety of stride paths, including running, jogging, and stepping. With one piece of equipment that creates an array of movement patterns, you can maximise valuable floor space and help exercisers to stay engaged in their workouts.

Product features

P84 TOUCHSCREEN CONSOLE

The P84 console features a brilliant 16-inch touchscreen that combines performance, entertainment and workout variety. Exercisers can enjoy seamless wireless casting that provides access to thousands of third-party fitness and media apps. They can also stream content through fully integrated PlutoTV, Netflix and YouTube apps—putting the content they want right at their fingertips.

OPEN STRIDE™

Open Stride is a unique feature that allows exercisers to dynamically adapt their stride length from 0 to 91 cm, as well as adjust their stride height from 17 to 25 cm, providing an infinite range of stride paths to engage various muscle groups. Open Stride can be adjusted from levels 1 to 5 using the tactile motion controls.

HANDLEBARS FIT EVERYONE

The tapered moving handlebars provide a comfortable fit for nearly every exerciser. The stationary grip has a built-in heart rate sensor* that provides monitoring and a stable, comfortable position when focusing on the lower body.

TOTAL BODY WORKOUT IN A SINGLE PIECE OF EQUIPMENT

Those using the equipment can transition from a short stride to a long stride, advance from walking to running and move from climbing to striding, enabling them to target various muscle groups. Pushing and pulling the moving handlebars will engage the upper body, resulting in a total body workout.

Specifications

Dimensions (L x W x H): 203 x 89 x 186 cm
