## Product Features

### MOVEMENT ARM GEOMETRY

Precise positioning of the movement arm pivot and handles places the exerciser in the optimal position to effectively work major muscles of the upper back.

### CHEST PAD

The chest pad provides upper body stability and comfort, enhancing the effective load and challenging the back muscles.

### ROLLER PADS AND FOOTPLATE

Large, oversized roller pads and the non-skid footplate enhance lower body comfort and stability, enabling the exerciser to maintain proper positioning throughout the exercise.

### HANDLES

Dual-position handles allow exercisers to easily vary the exercise position, enhancing the overall workout experience.
