GLUTEBUILDER® SELECTORIZED

3D Multi-Abductor Pro

GSL0622B

Developed in partnership with Glutebuilder and exclusively available from Precor, the Glutebuilder Selectorized line delivers targeted glute, leg, and hip training equipment in a space-efficient design. The precision biomechanics guide exercisers through a precise, guided motion path designed to maximize muscle engagement and support proper joint alignment. The multiple adjustment points and integrated weight stack allow exercisers to personalize fit and resistance, creating an approachable experience focused on lower-body training.

The Selectorized 3D Multi-Abductor Pro is designed to support standing, seated, and lying hip abduction in one unit, offering multiple training positions within a single footprint. Its 3D motion path follows the body's natural hip mechanics to increase glute engagement and allow for a fuller range of motion. A standing variation with footplates, front support handles, and an integrated hip belt provides added stability for controlled performance, while the weight stack placement helps create a more discreet training experience.

3D Multi-Abductor Pro

GSL0622B

Product Features

3D BIOMECHANICS

A unique 3D arc motion path combines hip abduction, external rotation, and extension to align with the natural mechanics of the hip and glute function. This movement path enhances range of motion and ensures consistent glute engagement throughout the exercise.

MULTI-POSITION TRAINING

Supports standing, seated, and lying hip abduction within one unit. Oversized knee pads, footplates, and front support handles enable a stable standing variation, expanding exercise options without increasing footprint.

STABILIZED HIP POSITIONING

An integrated hip belt stabilizes the pelvis to reduce lower-back involvement and support stronger, more controlled glute activation.

MULTIPLE ADJUSTMENT POINTS

A 7-position adjustable backrest provides targeted positioning to shift emphasis between the gluteus maximus and gluteus medius. Adjustable starting range of motion accommodates a wide range of exercisers and training preferences.

Specifications

Dimensions (L x W x H): 29 x 70 x 57 in / 74 x 178 x 145 cm
Weight Stack Tower Height: 58 in / 148 cm
Product Weight: 481 lb / 218 kg
Weight Stack: 330 lb / 150 kg
Frame and Finish: Heavy-duty steel tubing is welded in all structural areas to withstand the most demanding training environments. Powder coated frame.
Warranty: Visit www.precor.com for warranty terms.

Color Options*

Frame

Black Pearl
Gloss Metallic Silver
Gloss White**
Flame Red**

Upholstery

Black

Additional Upholstery Options**

Lite Grey
Graphite
