

RSL0502

Resolute™ Pin Selected Strength Line

Standing Lateral Raise

Make your pin selectorized strength equipment purchase with confidence – choose the Resolute™ Strength line from Precor. It delivers on what matters most: your investment will withstand the test of time.

The independent moving arms of the Resolute Strength Standing Lateral Raise allow exercisers to effectively target the rear deltoids and add variety to their workouts. The ergonomic rotating grips and smooth pulley system provide a comfortable and efficient exercise experience, minimising stress on the joints. Additionally, the open design makes the equipment easy to enter and exit.

RSL0502

Resolute™ Pin Selected Strength Line

Standing Lateral Raise

Precision biomechanics

The independent moving arms of the Standing Lateral Raise, along with ergonomic rotating hand grips, ensure proper form throughout the movement while effectively targeting the rear deltoids. The exercise can be performed unilaterally or bilaterally to provide variety, while the smooth pulley system enhances muscle engagement and minimises joint strain.

Designed to go the distance

Over-sized steel tubing lends a sleek, contemporary shape, and contributes to a more durable product. Tested to 250,000 cycles using the full weight stack, the Standing Lateral Raise is designed to go the distance.

Focused on the experience

No adjustments are needed to start working from a grounded standing position. The curved, rotating hand grips stabilise and provide comfort for the exerciser, accommodating all fitness levels.
